RESEARCH PROFILE

Amanullah Wakman is a PhD graduate in International Relations from Tarbiat Modares University, Tehran, Iran. His research focuses on foreign policy analysis, neighbourhood policy, regional politics, regional security, international political economy, peace and conflict, political stability and instability, soft power, governance, and International Relations theory, with particular emphasis on Afghanistan and its relations with neighbouring and regional powers.

His research examines the logic of change and continuity in foreign and neighbourhood policies and develops multidimensional analytical approaches to understanding political, security, economic, social, ideational, and environmental dynamics.

RESEARCH INTERESTS

- The Logic of Change and Continuity in Afghanistan's Neighbourhood Policy toward Iran
- The Logic of Change and Continuity in Ukraine's Neighbourhood Policy toward Russia
- The Taliban-U.S. Peace Agreement from the Perspective of Bargaining Game Theory
- The Role of China and India in Afghanistan's Political Stability
- The Role of Pakistan's Soft Power in Afghanistan's Political Instability
- The Normative Approach and Its Application to Governance under the Islamic Emirate
- Grotius Theory and the Principles of the Westphalian Order
- Critical Review of Liberalism in International Relations
- China's Economic Strategy in the Governance of Karzai and Ashraf Ghani

Khatam-al-Nabieen University, Kabul, Afghanistan | 2018–2020

Bachelor's Degree in Jurisprudence and Law
Takhar University, Takhar, Afghanistan | 2008–2012

DOCTORAL RESEARCH

The Logic of Change and Continuity in Afghanistan's Neighbourhood Policy toward Iran: A Comparative Study of the Republic Era and the Second Islamic Emirate Period

The doctoral research examines changes and continuities in Afghanistan's neighbourhood policy toward Iran across the Republican period and the Second Islamic Emirate period. The study develops a six-dimensional analytical framework covering political-diplomatic, security, economic-commercial, cultural-social, identity-ideological, and environmental-natural resource dimensions.

ANALYTICAL MODEL & RESEARCH EXPERIENCE

Developed a six-dimensional analytical model for comparative analysis of neighbourhood policy and regional politics. The framework examines change and continuity in states' neighbourhood policies across different political periods and regimes and is designed for comparative application to Afghanistan, Ukraine, and other regional cases.
